

SALES EXECUTIVE PERFORMANCE DASHBOARD

Sales Executive Performance Project

Overview

This project focuses on visualizing the performance of sales executives across different regions in India. The dashboard provides real-time insights into total sales, target achievement percentages, and comparative analysis of performance across multiple locations.

Introduction

Sales performance tracking is a critical component for any organization to assess productivity, identify top performers, and improve decision-making. This dashboard consolidates data from multiple regions and visualizes it using charts, tables, and KPIs for a quick and clear understanding.

Objective:

- To monitor and analyze sales executives' performance across different regions.
- To provide a visual representation of sales and target achievements. To help
- management identify trends, top performers, and areas needing improvement.

Dataset Description:

- **Source:** Company Sales Records **Regions Covered:** Bangalore, Chennai, Delhi, Hyderabad, Jaipur, Kolkata, Mumbai, Nagpur, Patna, Pune, Ranchi, Surat. **Regions Covered:** Bangalore, Chennai, Delhi, Hyderabad, Jaipur, Kolkata, Mumbai, Nagpur, Patna, Pune, Ranchi, Surat

Future Enhancements

- **Dashboard Tool:** Microsoft Excel
- **Data Visualization Methods:** Bar Charts, Pie Charts, Line Graphs, Tables

Data Fields:

- Sales Executive Name.
- Total Sales.
- Target Hit % Wise.
- Time Period: Daily and Regional-level Sales Data

Dashboard Features and Visuals

- **Interactive Regional Tabs:** Switch between cities to view specific performance data.
- **Performance Tables:** List of sales executives with total sales and target hit percentages.
- **Bar Charts:** Visual representation of sales figures for quick comparison.
- **Pie Charts:** Percentage share of executives' contributions.
- **Line Charts:** Trends in target achievement percentages.
- **Clean UI:** Color-coded regions and dashboards for easy navigation.

Key Insights

- Chennai and other regions show varying performance trends, highlighting differences in sales potential.
- Some executives significantly outperform others, achieving over 300,000% in target hit percentage (Dashboard 3).
- Target achievement is highly inconsistent across regions, indicating differences in sales strategies and market conditions.

Insights from Dashboards:

- **Dashboard 1:** Shows balanced performance with sales ranging from 2500 to 3200 units.
- **Dashboard 2:** Reveals moderate performance, with sales between 120 and 195 units.
- **Dashboard 3:** Exceptional target hit percentages, exceeding 300,000%, indicating potential errors in targets set or extraordinary performance.
- **Dashboard 4:** Displays high numerical values with closer performance among executives.
- **Dashboard 5:** Reveals a competitive sales environment with percentages ranging between 1760% and 2720%.

Conclusion

The dashboard provides a comprehensive view of sales performance across multiple regions. It identifies top-performing executives and highlights discrepancies in target settings. Such a dashboard can be instrumental in strategic planning and performance evaluation.

Future Enhancements

- Automating data updates using Power Query or APIs.
- Adding filters for time periods (weekly, monthly, quarterly).
- Including performance trend analysis and predictive forecasting.
- Integrating KPIs like revenue contribution, customer acquisition rate, and product-wise sales.
